- no overflow (overflow protection)
- vacuum suction emulsion
- adjustable mixing ratio
- high pressure (fast fill)
- high life (stainless steel body)
- made in precision

The filling station TAFAN-5000 is perfectly suited for machine tools of all kinds professional and fast to fill. With our professional mixing unit TAFAN-5000 the preparation of the machine emulsion and the filling of the plants can be done in one operation.

Self-priming (vacuum) ensures that the cooling lubricant concentrate can be sucked in without any problems and mixed with the tap water to form the emulsion. The automatic nozzle prevents overflowing at the of the machine.
